<b>End</b>		

*Ben Faber has degrees in Biology, Pomology and Soil Fertility. He has been a Farm Advisor in Santa Barbara and Ventura Counties since 1989, covering issues associated with production of subtropical crops. These topics include soil and plant nutrition, pests and diseases, management of crops during heat waves, soil and water improvements and overall crop productivity. His emphasis is on subtropical tree crops, such as citrus, avocado and cherimoya and Ben's goal is to contribute to profitable agriculture systems that optimise people and natural resources.*

*This event is part of the strategic levy investment project, Avocado industry development and extension (AV17005).*

*This project has been funded by Hort Innovation, using the Hort Innovation avocado research and development levy, co-investment from the Queensland Department of Agriculture and Fisheries, and contributions from the Australian Government. Hort Innovation is the grower-owned, not-for-profit research and development corporation for Australian horticulture.*
